

Release Notes – Z Office 1.4.568, Z Register 1.4.568 (June 2025)

What's New in this Update?

Added Average Basket \$ Widget to Z Office Dashboard

We have replaced our Optimal Brands widget on the Z Office Dashboard for an Average Basket \$ Widget. This shows a breakdown of the average dollar amount spent per customer over the specified time range. It also further breaks this down into the portion of scripts and OTC items that make it up.

The new **Average Basket \$** widget replaces the previous Optimal Brand % Widget.

Other Changes in this Update

- No other changes in this update

What's Fixed in this Update?

- Fixed an application error that occurred when merging suppliers
- Fixed an issue where Emails and SMS were not displaying emojis correctly

- Fixed an issue where discounted auto-charged scripts with multiple quantities would display as a positive instead of a negative value
